7,000 lb. Lift Capacity
3 Year Ltd. Warranty
150 Amp Circuit Breaker

- No Rust, Never Needs Paint
- Years of Unequaled Service
- Looks Great, Smooth Operation
- Body/Frame All Aluminum
- Greater Payloads and Larger Hauling Volume

TC-150 Leaf Express. All aluminum leaf topper fits on TC-121 and adds 7.6 cu. yds. of volume. Comes in tarp-top or hardtop version. Weighs less than 300 lbs. One year wty.

TC-121S Ultra Shorty for 6.5’ pickups. 7,000 lb dump cap; 1.9 Cu Yd vol; 3 Yr Wty; 55 Degree Dump Angle.

TC-131 D-ICER all aluminum and stainless steel tailgate replacement salt spreader. Spreads 10,000 lb/hr.

A Classy Pickup Dump Insert that will Last and Last!
Low Bed Height - only 3-1/4” above pickup bed

The 2.5 cubic yard payload offered by the TC-121 is positioned only 3-1/4 inches above your pickup floor. This feature adds greater volume and keeps the vehicle’s center of gravity low. It also reduces the height that heavy objects must be lifted into the bed.

3 Stage Telescopic Lift and Cab Protector

The ULTRA hoist system utilizes a heavy duty, three stage, telescopic cylinder with chromed rod sections. The hoist has been custom designed by TruckCraft to lift 7,000 lbs. to a 47° dump angle in just 18 seconds. The aerodynamic cab protector (left) provides low wind resistance and great visibility. The cab protector and a full tarp system are options that can be easily added to the TC-121 at any time.

Rigid Floor of Extruded Aluminum

The floor is constructed of aluminum alloy plank extrusions that provide rigid reinforcement every 5”. This “tongue and groove” design, proven in roll-back car carriers, keeps the floor from deflecting under heavy loads and eliminates the “washboard effect” seen in light-duty sheet-bed models.

Aluminum Rails add Overall Strength

The TC-121 design utilizes a polished and fluted aluminum alloy extrusion on the top box rail of the body sides and the top and bottom of the tailgate. This provides maximum strength at a minimum weight while greatly enhancing the product’s overall appearance.

Power Unit, Circuit Breaker & Remote Dump Control

A BUCHER™ hydraulic pump is mounted directly behind the cab in close proximity to the hoist. The remote control buttons activate the motor/pump from within the cab or up to 12 feet away. The 150 amp circuit breaker protects the motor and can be used to switch off power under the hood.

All Aluminum Bed - 48 1/8” x 98”

The bed holds a full sheet of plywood with the tailgate closed. The optional side board installation kit (top photo) used with your boards will increase the volumetric capacity from 2.5 cu. yds. to as much as 5 cu. yds.

Three-way Tailgate - Opens with one hand!

The TC-121 tailgate has a paddle latch and can be opened and closed with just one hand. The gate can easily be removed for complete access. Control chains can be adjusted for using the tailgate as a spreader.

The TC-121 ULTRA has been engineered from the ground up to provide users with years of maintenance free service. The body and frames are designed and constructed entirely of aluminum and stainless steel to provide durability and resistance to rust and corrosion. TruckCraft’s innovative use of aluminum alloy extrusions welded to sheet aluminum enables them to offer a pickup dump insert that is 300 – 350 lbs. lighter than comparable steel units. The result is a unit that weighs less, hauls more payload, and will be less expensive to operate and maintain. This classy accessory for your pickup is available through nationwide distribution.
